

## **EZTakes Has Published Over 1,000 Feature-length DVD Movie Downloads**

**By publishing over 1,000 downloadable DVDs, EZTakes has passed an important milestone that demonstrates the nearly unlimited scalability of its technology.**

Easthampton, MA, October 20, 2006 /PRWEB/ -- EZTakes has published a catalog of over 1,000 DVD downloads. Consumers can burn these movie downloads to recordable DVDs that will play on virtually any DVD player. By passing this important milestone only one month after coming out of beta testing, EZTakes has proven the scalability of its patent-pending technology.

Jim Flynn, CEO of EZTakes, commented, "Enabling people to easily burn DVDs that they can watch anytime and anywhere is the only practical way to deliver movie downloads over the Internet." Flynn continued, "We were first to market with this technology, and we will continue to innovate by delivering the kind of value and convenience that attracts paying customers, which in turn makes more money for our content partners."

The EZTakes service has set the industry standard for performance, features and ease-of-use. EZTakes supports both Macintosh and Windows users with all the same industry-leading functionality. In the next few months, EZTakes will continue introducing many new features that will enable its content partners to better monetize their video assets.

Although EZTakes has only been live for less than a year, the company has experienced a dramatic increase in sales and has already developed a loyal following of repeat customers. By making it easy to download movies that consumers can burn to DVD, EZTakes has bridged the gap between the Internet and the living room. Movies on EZTakes start as low as \$1.99 per download. Most EZTakes DVDs offer the same quality and all of the extra features of the original DVD.

About EZTakes:

EZTakes, Inc. is the first legal movie download service that gives consumers the ability to purchase full movie downloads that they can easily burn to playable DVDs. The company was founded in 2003 by experienced executives that have a long track record of building highly successful companies by using new technologies to exploit business opportunities.
